

Pediatrics

GlanceEMR Pediatrics has been designed to include and integrate the specialty elements required for efficient clinical documentation and the associated revenue capture in the Pediatric office to achieve 99+% collections.

CCHIT certified GlanceEMR Pediatric incorporates the highest standards of clinical documentation and interoperability required in the market place today. The specialty templates in this GlanceEMR specialty module were designed by Pediatrician for Pediatrician and incorporate the guidelines of the American Academy of Pediatrics.

Pediatric Specific Functionalities

- Document visit notes using GlanceEMR's age based templates.
- Templates to document well baby visits for different age groups.
